

# OSHA 3085

## Principles of Scaffolding

- Types of scaffolds
- Roles and responsibilities of personnel
- Scaffold design hazards, capacity hazards, erection and disassembly hazards, access/egress
- OSHA standards
- Scaffold erection, disassembly, and maintenance training

This course covers the requirements for construction and the safe construction and use of scaffolding using the OSHA construction scaffold standard as a guide. Course topics include hazards associated with scaffold design, assembly, disassembly and use, types of scaffolds, determining scaffold capacity, employee qualifications and training, and maintenance, repair, and inspection requirements. Students will participate in workshops to reinforce concepts of safe scaffolding. Upon course completion students will have the ability to identify the types of scaffolds and their components, determine safe assembly, use, and disassembly, and recognize common violations of OSHA Standards.
